oxabiol.

Preserve insect meals and oils with Oxabiol®

Insect meal and oil are **innovative and sustainable alternatives** to fishmeal and soybean. Rich in proteins, essential amino acids, and polyunsaturated fatty acids, they are **highly valuable** but **prone to lipid oxidation**, which reduces nutritional quality, palatability, and safety. **Natural antioxidants are the key to preserving their stability**.

At Btsa we offer OXABIOL®, natural antioxidant solution based on mixed tocopherols, specifically developed **to stabilize insect meals and oils**. It protects against lipid oxidation, extends shelf life, and ensures feed quality.

Oxabiol®

reliable & versatile performance

- **Protects insect** meals and oils from oxidation
- **Maintains nutritional value** and freshness
- **Prevents rancidity** and **off-flavors**
- **Natural,** safe and sustainable solution
