

tocobiol.

A Clean Label Approach to Chewing Gum Preservation

Chewing gum is a universal product, enjoyed worldwide. Yet, it is highly **sensitive to oxidation**, which impacts flavor, texture, and shelf life. While synthetic antioxidants (BHA, BHT) are common but controversial, **natural tocopherols (vitamin E)** offer effective protection, ensuring quality, safety, and a clean label.

At Btsa we offer Tocobiol®, a natural antioxidant from non-GMO vegetable oils, rich in tocopherols and the most effective clean-label solution to protect chewing gum

Tocobiol®

reliable & versatile performance

- Complies with **regulations** and **clean label** requirements
- Extends **shelf life** and preserves **flavor**
- Provides high **alpha-tocopherol** content
- Reinforces the perception of **quality and sustainability**
